MOODY'S ANNOUNCES RATING IMPACT OF 'GRI' METHODOLOGY FOR CORPORATE ISSUERS IN EMEA REGION

London, 23 June 2005 -- Moody's Investors Service published today the results of an examination of corporate sector ratings in Europe, the Middle East and Africa ("EMEA") in light of the introduction of its new rating methodology for government-related issuers ("GRIs").

In April 2005, Moody's published a Rating Methodology report, entitled "The Application of Joint-Default Analysis to Government-Related Issuers". The new methodology formally disaggregates the ratings of GRIs into four components: (i) an assessment of the GRI's baseline credit risk, (ii) the default risk of the supporting government, (iii) the default dependence between the GRI and the government, and (iv) the expected level of support from the government.

Below is a list of all corporate GRIs in the EMEA region affected by the new rating methodology, including the rating changes resulting from the application of the methodology.

For a detailed discussion of how Moody's evaluates corporate GRIs in practice, please refer to Moody's Special Comment entitled "Rating Government-Related Issuers in European Corporate Finance", also published today.

As previously indicated, in addition to the ratings assigned to issuers and debt securities, Moody's has also published ranges of methodology inputs for each GRI, as follows:

- Baseline credit assessment, on a scale of 1 (lowest credit risk) to 6 (highest credit risk)
- Local currency bond rating of the supporting government (as published by Moody's)
- Dependence, expressed as low, medium or high
- Support, expressed as low, medium or high

For details of these input ranges for individual GRIs, please refer to the Credit Opinions for each corporate GRI in the EMEA region. Please also refer to the separate Addendum to Moody's new GRI special comment ("Rating Government-Related Issuers in European Corporate Finance -- Addendum"), which outlines the ranges of inputs and rating outcomes for every corporate GRI in the EMEA region by sector and by country.

The following list outlines ratings affirmed, upgraded, or placed under review for upgrade following the application of the GRI rating methodology. The parent company is listed, with the rated entity in parentheses, the rated class of debt, and the final rating outcome and rating outlook.

MOODY'S hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MOODY'S have, prior to assignment of any rating, agreed to pay to MOODY'S for appraisal and rating services rendered by it fees ranging from \$1,500 to \$2,400,000. Moody's Corporation (MCO) and its wholly-owned credit rating agency subsidiary, Moody's Investors Service (MIS), also maintain policies and procedures to address the independence of MIS's ratings and rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold ratings from MIS and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually on Moody's website at www.moody.com under the heading "Shareholder Relations - Corporate Governance - Director and Shareholder Affiliation Policy."
